# Accessibility

These checks highlight opportunities to [improve the](#)

**Names and labels** — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Buttons do not have an accessible name

**Contrast** — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.

**Navigation** — These are opportunities to improve keyboard navigation in your application.

▲ `[id]` attributes on active, focusable elements are not unique

**Internationalization and localization** — These are opportunities to improve the interpretation of your content by users in different locales.

▲ `<html>` element does not have a `[lang]` attribute

**Additional items to manually check (10)** — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

## Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more.](#)

### Fast and reliable

● Page load is fast enough on mobile networks

▲ Current page does not respond with a 200 when offline

`start_url` does not respond with a 200 when offline

No usable web app manifest found on page.

92

80

100

67

PWA

## Installable

● Uses HTTPS

▲ Does not register a service worker that controls page and `start_url`

Web app manifest does not meet the installability requirements

▲ Failures: No manifest was fetched.

## ★ PWA Optimized

▲ Does not redirect HTTP traffic to HTTPS

▲ Is not configured for a custom splash screen Failures: No manifest was fetched.

▲ Does not set a theme color for the address bar.  
Failures: No manifest was fetched, No `<meta name="theme-color">` tag found.

▲ Content is not sized correctly for the viewport  
The viewport size of 980px does not match the window size of 360px.

▲ Does not have a `<meta name="viewport">` tag with `width` or `initial-scale`  
No `<meta name="viewport">` tag found

● Contains some content when JavaScript is not available

▲ Does not provide a valid `apple-touch-icon`

▲ Manifest doesn't have a maskable icon No manifest was fetched

**Additional items to manually check (3)** — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
